**Occupational Licensing Blueprint**

**License Details**

What is the license? **Pipe Pulling & Well Plugging**

What does the license cover? Pulling and/or Salvaging Casing, Purchasing Wells for the purpose of Salvaging Casing & Plugging Oil, Gas, Injection, Disposal or any other Service Wells

What Board regulates the license? **N/A. OGCD is authorized pursuant to OAC 165:10-11-1**

**Compelling Public Interest**

What is the compelling public interest (see Annex, item 1)? **Public Health & Public Safety**

Is this public interest a demonstrated, real, significant, and probable harm (see Annex, item 2)? **Yes**

**Least Restrictive Means**

What means is used to protect the public interest? **Occupational License**

Is it the least restrictive means (see Annex, item 3), which sufficiently protects the interest (see Annex, item 4)? **Yes**

If the answer to the above question is "No" then do not use that type of regulation to protect the public interest.

--------------------Continue only if Occupational Licensing was Used---------------------

**Controlling Number of Market Participants on the Board**

How many members are on the regulatory board? **N/A. OGCD has statutory authority pursuant to OAC 165:10-11-1**

How many of them are active market participants (see Annex, item 5)? **N/A**

Is the board controlled by these active market participants (see Annex, item 6)? **N/A**

--------------------Continue only if the Board is Controlled by Market Participants--------------------

**Active Supervision of the Board**

Is there active state supervision of the board (see Annex, item 7)? **Click or tap here to enter text.**
Occupational Licensing Blueprint

License Details

What is the license? Petroleum Storage Tank Division Aboveground Storage Tank Licensee (PSTD AST Licensee).

What does the license cover? Individuals who install, remove, or repair aboveground storage tank systems in the State of Oklahoma.

What Board regulates the license? N/A. The PSTD is authorized by 17 O.S. § 318 to implement the licensing program.

Compelling Public Interest

What is the compelling public interest (see Annex, item 1)? Public Health and Public Safety.

Is this public interest a demonstrated, real, significant, and probable harm (see Annex, item 2)? Yes. The PSTD shall protect the public health, safety, welfare, and the environment.

Least Restrictive Means

What means is used to protect the public interest? Occupational License.

Is it the least restrictive means (see Annex, item 3), which sufficiently protects the interest (see Annex, item 4)? Yes.

If the answer to the above question is "No" then do not use that type of regulation to protect the public interest.

--------------------Continue only if Occupational Licensing was Used--------------------

Controlling Number of Market Participants on the Board

How many members are on the regulatory board? N/A. The PSTD is authorized by 17 O.S. § 318 to implement the licensing program.

How many of them are active market participants (see Annex, item 5)? N/A

Is the board controlled by these active market participants (see Annex, item 6)? N/A

--------------------Continue only if the Board is Controlled by Market Participants--------------------

Active Supervision of the Board

Is there active state supervision of the board (see Annex, item 7)? No

If the answer to the above question is "No" then board’s conduct may violate the Sherman Act and the board’s actions are not protected by state immunity.
Occupational Licensing Blueprint

License Details

What is the license? Petroleum Storage Tank Division (PSTD) Environmental Consultant

What does the license cover? Individuals involved in the corrective action of petroleum releases from underground or aboveground storage tanks. Environmental Consultants also assist with sampling at underground and aboveground tank closures.

What Board regulates the license? N/A. The PSTD is authorized by 17 O.S. § 318 to implement a licensing program.

Compelling Public interest

What is the compelling public interest (see Annex, item 1)? Public Health and Public Safety.

Is this public interest a demonstrated, real, significant, and probable harm (see Annex, item 2)? Yes. The PSTD shall protect the public health, safety, and the environment.

Least Restrictive Means

What means is used to protect the public interest? Occupational License.

Is it the least restrictive means (see Annex, item 3), which sufficiently protects the interest (see Annex, item 4)? Yes.

If the answer to the above question is "No" then do not use that type of regulation to protect the public interest.

Occupational Licensing Blueprint

License Details

What is the license? Oklahoma Teaching Certificate

What does the license cover? If the Oklahoma State Department/Board of Education (OSDE) issues a teaching certificate to an individual, the certificate permits an Oklahoma public school district to contract with that individual to teach public school students in the subject area(s) of the issued certificate. A public school district is prohibited from contracting with an individual who does not have a valid certificate and, with some exceptions, the individual may not teach in a subject area in which they do not have a valid certificate. 70 O.S. 6-101(A). Additionally, for purposes of employment and for to obtain a teaching certificate, individuals must have had a national criminal history record check, and this check is done by the Oklahoma State Bureau of Investigation vis-à-vis the OSDE through obtaining fingerprints of the employee or prospective employee.

What Board regulates the license? State Board of Education - 70 O.S. Sec. 3-104

Compelling Public Interest

What is the compelling public interest? (see Annex, item 1) Health, safety

Is this public interest a demonstrated, real, significant, and probable harm? (see Annex, item 2) ☒ Yes ☐ No

Least Restrictive Means

What means is used to protect the public interest? The Legislature and State Board have established standards that must be met to obtain a certificate, and each have established standards when the certificate must - and can - be revoked. 70 O.S. Sec. 3-104, Sec. 3-104.1; Oklahoma Administrative Code 210:1-5-6

Is it the least restrictive means (see Annex, item 3), which sufficiently protects the interest? (see Annex, item 4) ☒ Yes ☐ No

If the answer to the above question is "No" then do not use that type of regulation to protect the public interest.

Occupational Licensing Blueprint

License Details
What is the license? Certification of Installers of Septic Systems

What does the license cover? The certification allows qualified individuals to install and self-inspect on-site sewage treatment systems.

What Board regulates the license? The certificate is issued by the administrative agency (DEQ) itself, not by a Board. Employees of DEQ are not market participants.

Compelling Public Interest
What is the compelling public interest (see Annex, item 1)? Public health and public safety. The proper design and installation of on-site sewage treatment systems by certified individuals ensures that wastewater is properly treated, groundwater is protected and reduces the incidence of disease in humans.

Is this public interest a demonstrated, real, significant, and probable harm (see Annex, item 2)? Yes.

Least Restrictive Means
What means is used to protect the public interest? Government certification

Is it the least restrictive means (see Annex, item 3), which sufficiently protects the interest (see Annex, item 4)? Yes

If the answer to the above question is “No” then do not use that type of regulation to protect the public interest.

------------------------Continue only if Occupational Licensing was Used------------------------

Controlling Number of Market Participants on the Board
How many members are on the regulatory board? The license is issued by the administrative agency (DEQ) itself, not by a Board. Employees of DEQ are not market participants.

How many of them are active market participants (see Annex, item 5)? N/A

Is the board controlled by these active market participants (see Annex, item 6)? N/A

------------------------Continue only if the Board is Controlled by Market Participants------------------------

Active Supervision of the Board

Is there active state supervision of the board (see Annex, item 7)? NA

If the answer to the above question is “No” then board’s conduct may violate the Sherman Act and the board’s actions are not protected by state immunity.
Occupational Licensing Blueprint

License Details
What is the license? License to Pump and Transport Septage

What does the license cover? The license covers the applicant’s activities involving pumping, transporting and disposing of septage.

What Board regulates the license? The license is issued by the administrative agency (DEQ) itself, not by a Board.

Compelling Public Interest
What is the compelling public interest (see Annex, item 1)? Public health and public safety. The licensing of individuals as Septage Pumpers and Transporters provides for the reliable removal and disposal of septic tank and portable toilet waste. Improper hauling and dumping of septage would result in significant impact to the waters of the state and provide a direct pathway for the transmission of infectious disease.

Is this public interest a demonstrated, real, significant, and probable harm (see Annex, item 2)? Yes.

Least Restrictive Means
What means is used to protect the public interest? Business license

Is it the least restrictive means (see Annex, item 3), which sufficiently protects the interest (see Annex, item 4)? Yes

If the answer to the above question is “No” then do not use that type of regulation to protect the public interest.

--------------Continue only if Occupational Licensing was Used---------------------

Controlling Number of Market Participants on the Board

Is there active state supervision of the board (see Annex, item 7)? N/A

If the answer to the above question is “No” then board’s conduct may violate the Sherman Act and the board’s actions are not protected by state immunity.
Occupational Licensing Blueprint

License Details
What is the license? Certification for Soil Profiling

What does the license cover? Certification allows persons to conduct soil profile testing for the safe and proper design of on-site sewage treatment systems.

What Board regulates the license? The certification is issued by the administrative agency (DEQ) itself, not by a Board.

Compelling Public Interest
What is the compelling public interest (see Annex, item 1)? Public health and public safety. The design of on-site sewage treatment systems by certified individuals ensures that wastewater is properly treated, thus reducing groundwater contamination and other health hazards. Accurate identification of soil characteristics is essential for the design and installation of these systems.

Is this public interest a demonstrated, real, significant, and probable harm (see Annex, item 2)? Yes.

Least Restrictive Means
What means is used to protect the public interest? Government certification

Is it the least restrictive means (see Annex, item 3), which sufficiently protects the interest (see Annex, item 4)? Yes

If the answer to the above question is “No” then do not use that type of regulation to protect the public interest.

--------------------------------------------------------------- Continue only if Occupational Licensing was Used ---------------------------------------------------------------

Controlling Number of Market Participants on the Board
How many members are on the regulatory board? The license is issued by the administrative agency (DEQ) itself, not by a Board.

How many of them are active market participants (see Annex, item 5)? N/A

Is the board controlled by these active market participants (see Annex, item 6)? N/A

--------------------------------------------------------------- Continue only if the Board is Controlled by Market Participants ---------------------------------------------------------------

Active Supervision of the Board
Is there active state supervision of the board (see Annex, item 7)? N/A

If the answer to the above question is “No” then board’s conduct may violate the Sherman Act and the board’s actions are not protected by state immunity.
Occupational Licensing Blueprint

License Details
What is the license? Industrial Radiography Certification

What does the license cover? Federal Regulations require anyone that acts as an industrial radiographer using radioactive materials to be certified through an approved certifying agency. Oklahoma DEQ is an approved certifying agency.

What Board regulates the license? The certification is issued by the administrative agency (DEQ) itself, not by a Board.

Compelling Public interest
What is the compelling public interest (see Annex, item 1)? Public Health and Safety. Radioactive materials are inherently very hazardous if handled improperly.

Is this public interest a demonstrated, real, significant, and probable harm (see Annex, item 2)? Yes. Radioactive materials are essentially dangerous and pose significant hazards if not properly handled. By requiring training and certification of individuals operating in this field the chances of injuries are greatly reduced.

Least Restrictive Means
What means is used to protect the public interest? Government certification

Is it the least restrictive means (see Annex, item 3), which sufficiently protects the interest (see Annex, item 4)? Yes.

If the answer to the above question is “No” then do not use that type of regulation to protect the public interest.

-----------------------------------------------Continue only if Occupational Licensing was Used-----------------------------------------------

Controlling Number of Market Participants on the Board
How many members are on the regulatory board? N/A

How many of them are active market participants (see Annex, item 5)? N/A

Is the board controlled by these active market participants (see Annex, item 6)? N/A

-----------------------------------------------Continue only if the Board is Controlled by Market Participants-----------------------------------------------

Active Supervision of the Board
Is there active state supervision of the board (see Annex, item 7)? Not applicable

If the answer to the above question is "No" then board's conduct may violate the Sherman Act and the board's actions are not protected by state immunity.
Occupational Licensing Blueprint

License Details
What is the license? Lead-Based Paint (LBP) Supervisor Certification

What does the license cover? This certification covers the supervision of all abatement activities designed to permanently eliminate lead-based paint (LBP) hazards, including preparation, cleanup, disposal and documentation of post abatement clearance testing activities. The LBP Supervisor is required to take a 32-hour training course and state certification exam as a proficiency test.

What Board regulates the license? The license is issued by the administrative agency (DEQ) itself, not by a Board.

Compelling Public Interest
What is the compelling public interest (see Annex, item 1)? Public health and public safety, specifically to ensure that individuals and firms conducting LBP activities in target housing do so in a way that safeguards the environment and protects the health of building occupants, especially children aged 6 and under.

Is this public interest a demonstrated, real, significant, and probable harm (see Annex, item 2)? Yes, many homes built prior to 1978 contain lead-based paint. Probable harm can result from peeling LBP and lead dust because it is hazardous to children under the age of six and the elderly. Intact LBP that is disturbed can result in the creation of LBP hazards.

Least Restrictive Means
What means is used to protect the public interest? Government Certificate.

Is it the least restrictive means (see Annex, item 3), which sufficiently protects the interest (see Annex, item 4)? Yes.

If the answer to the above question is “No” then do not use that type of regulation to protect the public interest.

--------------------------------Continue only if Occupational Licensing was Used--------------------------------

Controlling Number of Market Participants on the Board
How many members are on the regulatory board? N/A

How many of them are active market participants (see Annex, item 5)? N/A

Is the board controlled by these active market participants (see Annex, item 6)? N/A

--------------------------------Continue only if the Board is Controlled by Market Participants--------------------------------

Active Supervision of the Board
Is there active state supervision of the board (see Annex, item 7)?

If the answer to the above question is “No” then board’s conduct may violate the Sherman Act and the board’s actions are not protected by state immunity.

License Details
What is the license? Lead Based Paint (LBP) Inspector Certification

What does the license cover? The certification covers the performance of a surface by surface investigation for the presence of lead-based paint in target housing and child-occupied facilities (built prior to 1978).

What Board regulates the license? The license is issued by the administrative agency (DEQ) itself, not by a Board. Employees of DEQ are not market participants.

Compelling Public Interest
What is the compelling public interest (see Annex, item 1)? Public health and public safety, specifically to ensure that individuals and firms conducting LBP activities in target housing and child occupied facilities do so in a way that safeguards the environment and protects the health of building occupants, especially children aged 6 years and under.

Is this public interest a demonstrated, real, significant, and probable harm (see Annex, item 2)? Yes. Probable harm can result from peeling LBP and lead dust because it is hazardous to children under the age of six and the elderly. Any intact LBP that is disturbed can result in the creation of LBP hazards.

Least Restrictive Means
What means is used to protect the public interest? The accredited training program requires that safe work practices, proper analytical procedures, and documented methodologies are taught. Licensees are required to pass a DEQ-administered certification exam to demonstrate their proficiency in writing inspection reports, performing inspections, and reporting activities to the DEQ for internal review.

Is it the least restrictive means (see Annex, item 3), which sufficiently protects the interest (see Annex, item 4)? Yes

If the answer to the above question is "No" then do not use that type of regulation to protect the public interest.

License Details
What is the license? Lead-Based Paint (LBP) Abatement Worker

What does the license cover? The certification covers the performance of lead-based paint abatement activities in homes or child-occupied facilities, such as day care centers and kindergartens built prior to 1978.

What Board regulates the license? The certification is issued by the administrative agency (DEQ) itself, not by a Board. Employees of DEQ are not market participants.

Compelling Public Interest
What is the compelling public interest (see Annex, item 1)? Public health and public safety, specifically ensuring that individuals conducting LBP work in target housing and child occupied facilities do so in a way that safeguards the environment and protects the health of building occupants, especially children under age six.

Is this public interest a demonstrated, real, significant, and probable harm (see Annex, item 2)? Yes. Any intact LBP that is disturbed can result in the creation of LBP hazards.

License Details
What is the license? Lead-Based Paint (LBP) Project Designer Certification

What does the license cover? The certification covers designing abatement projects and occupant protection plans, and preparing abatement reports for large-scale abatement projects in target housing and child-occupied facilities.

What Board regulates the license? The certification is issued by the administrative agency (DEQ) itself, not by a Board.

Compelling Public interest
What is the compelling public interest (see Annex, item 1)? Public health and public safety, specifically to ensure that individuals involved designing lead based paint abatement are qualified and do so in a safe and protective manner.

Is this public interest a demonstrated, real, significant, and probable harm (see Annex, item 2)? Yes. Lead based paint is a demonstrated hazard, especially involving the elderly and children under the age of six.

Least Restrictive Means
What means is used to protect the public interest? Government certification.

Is it the least restrictive means (see Annex, item 3), which sufficiently protects the interest (see Annex, item 4)? Yes.

If the answer to the above question is “No” then do not use that type of regulation to protect the public interest.

Occupational Licensing Blueprint

License Details
What is the license? Certificates are issued for level D through A water operators, D through A wastewater operators, C through A water and wastewater laboratory technicians, and D through C distribution and collection operators.

What does the license cover? Certifies that the individual has sufficient training and experience to oversee the operation of treatment, collection and distribution processes for public water supplies to protect the public health of consumers of public drinking water. The wastewater certificates ensure adequate training and skill to oversee wastewater management facilities and regulate the discharge of wastewater into rivers and streams. The various levels of certification required are dependent on the population served and the complexity of the treatment processes required.

What Board regulates the license? Certificates are issued by the administrative agency (DEQ) itself, not by a Board. Employees of DEQ are not market participants.

Compelling Public Interest
What is the compelling public interest (see Annex, item 1)? To protect public health and public safety by ensuring a safe supply of potable water and that wastewater is treated and managed in a manner to prevent any negative impact to public health or the environment.

Is this public interest a demonstrated, real, significant, and probable harm (see Annex, item 2)? Yes.

Least Restrictive Means
What means is used to protect the public interest? Issuing certificates to individuals involved in the work.

Is it the least restrictive means (see Annex, item 3), which sufficiently protects the interest (see Annex, item 4)? Yes.

If the answer to the above question is “No” then do not use that type of regulation to protect the public interest.
