Commissioner Costello Recognizes Thermal Engineering International

Oklahoma City – Labor Commissioner Mark Costello recognized Thermal Engineering International’s Sapulpa Manufacturing Plant with a SHARP Commendation presented to Safety Manager Matt Truitt during a lunch presentation on September 8th at TEI’s facility.

Thermal Engineering International is a leading supplier of heat transfer technology. TEI has been designing and fabricating surface condensers, feedwater heaters, power plant heat exchangers and moisture separator reheaters for the world’s power generation industry for over 50 years.

Commissioner Costello stated “It’s exciting to see a company like TEI commit so much time and effort into their safety and health program. SHARP is a rigorous program and takes commitment from both the employees and management. TEI has proven that safety comes first.”

The Safety and Health Achievement Recognition Program (SHARP) recognizes employers who operate at their worksites exemplary safety and health programs that result in the immediate and long-term prevention of job-related injuries and illnesses.

“SHARP has enhanced our plant safety culture and has made a substantial decrease in the reduction of workers compensation cost,” stated Phil Randall, General Operations Manager of thermal Engineering International (USA), Inc.

Commissioner Costello joined Senator Brian Bingman and Representative Mark McCullough along with other local officials in recognizing TEI.
