*Safety & Health  
Consultation Services*

Oklahoma Department of Labor

## What is involved in an on-site consultation?

- Request
- On-site Visit
- Findings & Recommendations
- Hazard Abatement
- Written Report

## What are my obligations?

When you request and agree to a consultation, you agree to correct any serious hazards or imminently dangerous situations identified.

Consultants will work with you to correct hazards for employee safety in the time frame agreed upon by you and your consultant.

- Safety and health professionals provide over 500 consultations each year
- Trained on OSHA Standards in the same manner as federal OSHA compliance officers.
- Consultants statewide with expertise in Oklahoma industries
- Will not issue fines or citations
- Consultations will not trigger federal OSHA inspections when working to correct problems.

## The Oklahoma Safety Pays OSHA Consultation Program

*Safety Pays* OSHA Consultation program is a free and confidential service designed to help small, private sector Oklahoma employers understand and comply with OSHA standards. The program is funded primarily by a grant from federal OSHA.

### WE DO NOT FINE

Our experienced, professional consultants do not fine or cite employers for safety or health hazards at worksites. Instead we offer employers real solutions on correcting workplace safety and health issues. The primary focus of the program is to

assist small employers. Those employers obtaining SHARP status have experienced program savings on workers' compensation costs and avoided

costly OSHA inspections. Upon completion of the program, employers can be exempt from OSHA scheduled inspections.

As part of this full-service consultation, a consultant will evaluate the physical worksite involved. They will verify your Standard Industrial Classification codes, number of employees and accuracy your OSHA 300 logs. This will help determine your injury/illness rate as it compares to the national average in your industry.

### BENEFITS

You can reduce your workers' compensation costs by working with *Safety Pays* OSHA Consultation. You will eliminate costs resulting from occupational injuries and illnesses. We will assist you in your effort to comply with the requirements of

the OSHA Act and OSHA regulations. Our consultation service will help you establish a workplace safety plan to meet the occupational safety and health requirements of the workers' compensation law of Oklahoma.
