1. Incidence rates represent the number of injuries or illnesses per 100 full-time workers and were calculated as (Nx200,000)/EH where:
 N = number of injuries and illnesses,
 EH = total hours worked by all employees during the calendar year, and
 200,000 = base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks per year).

1. Incidence rates represent the number of injuries or illnesses per 100 full-time workers and were calculated as $(N \times 200,000) / EH$ where:
N = number of injuries and illnesses,
EH = total hours worked by all employees during the calendar year, and
200,000 = base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks per year).

-
1. Incidence rates represent the number of injuries or illnesses per 100 full-time workers and were calculated as $(N \times 200,000) / EH$ where:
N = number of injuries and illnesses,
EH = total hours worked by all employees during the calendar year, and
200,000 = base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks per year).

Source: Oklahoma Department of Labor Statistical Research and Analysis Division.

1. Incidence rates represent the number of injuries or illnesses per 100 full-time workers and were calculated as $(N \times 200,000) / EH$ where:
 N = number of injuries and illnesses,
 EH = total hours worked by all employees during the calendar year, and
 200,000 = base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks per year).

Table 7: School Occupational Injury and Illness Incidence Rates¹ for 2012

School	2012 Reported Employment	Total Recordable Cases	Cases with Days Away From Work	Cases with Job Transfer or Restriction	Other Recordable Cases
---------------	---------------------------------	-------------------------------	---------------------------------------	---	-------------------------------

-
1. Incidence rates represent the number of injuries or illnesses per 100 full-time workers and were calculated as $(N \times 200,000) / EH$ where:
N = number of injuries and illnesses,
EH = total hours worked by all employees during the calendar year, and
200,000 = base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks per year).

Table 8: School Occupational Injury and Illness Incidence Rates¹ for 2012

School	2012 Reported Employment	Total Recordable Cases	Cases with Days Away From Work	Cases with Job Transfer or Restriction	Other Recordable Cases
---------------	---------------------------------	-------------------------------	---------------------------------------	---	-------------------------------

-
1. Incidence rates represent the number of injuries or illnesses per 100 full-time workers and were calculated as $(N \times 200,000) / EH$ where:
N = number of injuries and illnesses,
EH = total hours worked by all employees during the calendar year, and
200,000 = base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks per year).

Source: Oklahoma Department of Labor Statistical Research and Analysis Division.

1. Incidence rates represent the number of injuries or illnesses per 100 full-time workers and were calculated as $(N \times 200,000) / EH$ where:
 N = number of injuries and illnesses,
 EH = total hours worked by all employees during the calendar year, and
 200,000 = base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks per year).
