Elimination of Medicare Renewal Training Requirement

Effective July 14, 2013

Effective July 14, 2013, Oklahoma producers who sell, solicit, or negotiate Medicare Advantage (including private fee for service plans) or Medicare Prescription Drug products and plans are **no longer** required to complete four (4) hours of Medicare Advantage or Medicare Prescription Drug product continuing education each biennial renewal period. Due to this change, all courses currently approved for the Medicare renewal requirement will remain the same with the current course number and course category as the course applies to a producer's general continuing education requirement. As courses are submitted for renewal, the course category will be changed to **Producer General** and a new course number will be assigned and emailed to the CE Provider contact.

All current continuing education requirements can be viewed by visiting www.oid.ok.gov, clicking on **Licensing and Education**, selecting **Licensee Information** under **Education Tools**, and then selecting **Requirements & Renewal Guidelines**.

Should you have any questions regarding this notice, please feel free to e-mail the Education Division at education@oid.ok.gov.
