This Agreement (this "Agreement", this "Master Price Agreement", or this "Contract") is made and entered into by IBM Corporation, 4660 La Jolla Village Drive, Suite 300, San Diego, CA 92122 ("Contractor") and the State of Minnesota, Department of Administration ("State") on behalf of the State of Minnesota, participating members of the National Association of State Procurement officials (NASPO), members of the Western States Contracting Alliance (WSCA) and other authorized Purchasing Entities. (collectively referred to herein as "Customer" or "State").

RECITALS

WHEREAS, the State has the need to purchase and the Contractor desire to sell; and,
WHEREAS, the State has the authority to offer contracts to CPV members of the State of Minnesota and to other states.

NOW, THEREFORE, in consideration of the mutual promises contained herein, the parties agree as follows:

INTENT AND PURPOSE

The intent and purpose of this Agreement is to establish a contractual relationship with equipment manufacturers to provide, warrant, and offer maintenance services on **ALL** Products proposed in their response to the RFP issued by the State of Minnesota. Delivery, support, warranty, and maintenance may be provided by the Contractor using subcontractors. The Contractor agrees to take legal responsibility for the warranty and maintenance of all Products furnished by Contractor under this Agreement. The Contractor is responsible for the timeliness and quality of all Services provided by individual subcontractors. Subcontractor participation on engagements involving other Participating Entities will be governed by those individual Participating Entities, who have the sole discretion to determine if they will accept Services from a subcontractor.

Individual Purchasing Entities may enter in to lease agreements for the Products covered in this Master Price Agreement, if they have the legal authority to enter into these types of agreements without going through a competitive process, and if the Contractor submitted copies of its lease agreements with its response to the RFP. The lease agreements were not reviewed or evaluated as part of the RFP evaluation process. The agreements are located in Exhibit C, Value-Added Services.

This Agreement is **NOT** for the purchase of major, large hardware or hardware and software offerings. In general, individual units/configurations for servers and storage (SANs, etc.) should not exceed \$300,000 each. Desktop per unit/configuration costs should not exceed \$100,000. Printers of all types and monitors per unit/configuration costs should not exceed \$50,000 each. It is the expressed intent of some of the Participating States to set this level at not to exceed \$25,000 each, or \$50,000. Contractors must be willing to comply with these restrictions by agreeing to supply Products in those price ranges only. This **IS NOT** a restriction on how many units/configurations can be purchased, but on the value of each individual unit/configuration. Individual Participating States and Participating Entities may set specific limits in a participating addendum above these limits, provided that if such purchases are under this Agreement, they will be with the prior approval of the WSCA Directors; or may set specific limits in a participating addendum below these limits.

Contractors may offer, but participating states and entities do not have to accept, limited professional Services related **ONLY** to the equipment and configuration of the equipment purchased through this Agreement.

1. Definitions

“Announced Promotional Price” are prices offered nationally to specific categories of customers (Consumer, Business or government) for defined time periods under predefined terms and conditions.

“Consumables” those items that are required for the operation of the Equipment offered or supplied which are consumed over time with the purchaser’s use of the equipment are included – printer cartridges, batteries, projector bulbs, etc. Consumables such as magnetic media, paper and generally available office supplies are excluded.

“Configuration” in most instances in this document means a total system configuration. This may include more than one model or part number (or SKU), or a combination of hardware, software, and configuring of the system to make the system work.

“Contract” means a binding agreement for the procurement of items of tangible personal property, software, or services or for the use of items provided to Customer by Contractor under license. Contract, Agreement, and Master Price Agreement are used interchangeably in this document.

“Contractor” means the successful Responder who enters into a binding Master Price Agreement. The Contractor is responsible for all sales, support, warranty, and maintenance Services for the Products it agrees to provide under this Agreement. The Contractor must manufacture or take direct, non-assignable, legal responsibility for the manufacture of the equipment and warranty thereof. For the purposes of this Contract, the term Contractor and Contract Vendor are synonymous.

“CPV Member” is any governmental unit having independent policy making and appropriating authority, that is a member of Minnesota’s Cooperative Purchasing Venture (CPV) program.

“CPV Program.” The Cooperative Purchasing Venture (CPV) program, as

established by Minn. Stat. § 16C.03, subd. 10, authorizes the commissioner of Administration to "enter into a cooperative purchasing agreement for the provision of goods, services, and utilities with [governmental entities] ..., as described in section 471.59, subdivision 1." Based on this authority, the commissioner of Administration, through the Materials Management Division (MMD), enters into a joint powers agreement that designates MMD as the authorized purchasing agent for the governmental entity. It is not legal for governmental entities that are not members of the CPV program to purchase from a State contract. Vendors are free to respond to other solicitations with the same prices they offer under a contract, but that is not considered use of the "State contract price."

"Cumulative Volume Discount" means a contractual, cumulative, permanent volume discount based on dollars resulting from the cumulative purchases by all governmental purchasers for the duration of the Master Price Agreement.

"Customer Set-Up Equipment" means IBM Equipment that Customer is responsible for installing according to instructions provided with it.

"Date of Installation" means the following:

- a. for IBM Equipment that IBM is responsible for installing, the business day after the day IBM installs it or, if Customer defers installation, makes it available to Customer for subsequent installation by IBM;
- b. for Customer Set-Up Equipment and non-IBM Equipment, the second business day after the Equipment's standard transit allowance period; and
- c. for a software Product --
 - (1) basic license, the second business day after the software Product's standard transit allowance period,

B. Termination for Cause

Either party may terminate this Agreement, or a Purchase Order, for cause based upon material breach of this Agreement, or the Purchase Order, by the other party, provided that the non-breaching party shall give the breaching party written notice specifying the breach and shall afford the breaching party a reasonable opportunity to correct the breach. The non-breaching party shall retain any and all other remedies available to it under the law.

In the event this Agreement expires or is terminated for any reason, except non-payment of fees, a Purchasing Entity shall retain its rights in all Products and Services accepted prior to the effective termination date.

Notwithstanding any language to the contrary in this Agreement or in any Purchase Order or other document, a Purchasing Entity may terminate its obligations under this Agreement, if sufficient appropriations are not made by the governing entity at a level sufficient to allow for payment of the Products or Services due for multiple year agreements, or if operations of the Purchasing Entity are being discontinued. The Purchasing Entity's decision as to whether sufficient appropriations are available shall be accepted by the Contractor and shall be final and binding.

A Purchasing Entity shall provide sixty (60) days notice, if possible, of its intent to terminate for reason cited above. Such termination shall relieve the Purchasing Entity, its officers and employees from any responsibility or liability for the payment of any further amounts under the relevant Purchase Order except for Services already performed or Products already delivered.

23. Payments to Subcontractors

In the event the Contractor hires subcontractors to perform all or some of the duties of this Contract, for state agency Purchase Entities in the Lead State, the Contractor understands that in accordance with Minn. Stat. § 16A.1245 the Contractor shall, within ten (10) days of the Contractor's receipt of payment from the Lead State Purchasing Entity for undisputed services provided by the subcontractor, pay all subcontractors having an interest in the applicable Purchase Order their share of the payment for undisputed services provided by the subcontractors. The Contractor is required to pay interest of 1-1/2 percent per month or any part of a month to the subcontractor on any undisputed amount not paid on time to the subcontractor. The minimum monthly interest penalty payment for an unpaid, undisputed balance of \$100 or more will be \$10. For an unpaid balance of less than \$100, the amount will be the actual penalty due. A subcontract that takes civil action against the Contractor to collect interest

penalties and prevails will be entitled to its costs and disbursements, including attorney's fees that were incurred in bringing the action. The Contractor agrees to take all steps necessary to comply with said statute. A consultant is a subcontractor under this Contract. Notwithstanding, for the purposes of this Section 23, this section shall not apply to Contractor's obligations to its business development partners, including its authorized resellers and service providers, where Contractor's obligations to its partners are bound by the terms of a separate business development partner agreement between partner and the Contractor. In the event the Contractor fails to make timely payments to a subcontractor, the State may, at its sole option and discretion, pay a subcontractor or supplier any amounts due from the Contractor and deduct said payment from any remaining amounts due the Contractor under this Agreement. Before any such payment is made to a subcontractor or supplier, the State shall provide the Contractor written notice that payment will be made directly to a subcontractor. If there are not remaining outstanding payments to the Contractor, the State shall have no obligation to pay or to see to the payment of money to a subcontractor except as may otherwise be required by law.

The Contractor shall ensure that the subcontractor transfers all intellectual or industrial property rights, including but not limited to any copyright it may have in the work performed under this Contract, consistent with the intellectual property rights and ownership sections of this Contract. In the event the Contractor does not obtain the intellectual property rights of the subcontractor consistent with the transfer of rights under this Contract, the State may acquire such rights directly from the subcontractor. Any and all costs associated with such a direct transfer may be deducted from any amount due the Contractor.

24. Indemnification, Hold Harmless and Limitation of Liability

The Contractor shall indemnify, protect, save and hold harmless the Lead State, Participating Entities, and its agencies and employees, from any and all claims or causes of action, including attorney's fees for personal injury or damage to real or tangible personal property arising from the negligent or willful acts or omissions of the Contractor, or its agents, employees, or subcontractors in the performance of this Agreement. Contractor shall not be liable for damages that are the result of negligence or intentional wrong doing by the lead state, participating entity or its employees. This clause shall not be construed to bar any legal remedies the Contractor may have with the State's or Participating Entities' failure to fulfill its obligations pursuant to this Agreement.

The State agrees that the Contractor, its principals, members and employees shall not be liable to the State or any Purchasing Entity, unless otherwise stated in the applicable Participating Addendum, for any actions, damages, claims, liabilities, costs, expenses, or losses in any way arising out of or relating to this Agreement or the Products provided or Services performed hereunder for an aggregate amount in excess of two million dollars (\$2,000,000.00). The foregoing limitation does not apply to Paragraph 12 and 24 of this Agreement or to damages resulting from personal injury caused by the Contractor's negligence. In no event shall the Contractor be liable for any indirect, special, punitive, or consequential damages arising out of this Agreement or the use of the Products or Services purchased by the Purchasing Entity hereunder, loss of, or damage to

data, loss profits, business, revenue, goodwill, or anticipated savings even if the contractor has been advised of the possibility of such damages. Both parties agree that this Agreement does not create any right or cause of action for any third party against the other except for third party claims that fit within the indemnification provision of this Agreement.

25. Amendments

Contract amendments shall be negotiated by the State with the Contractor whenever necessary to address changes in the terms and conditions, costs, timetable, or increased or decreased scope of work. This Agreement shall be amended only by written instrument executed by the parties. An approved Contract amendment means one approved by the authorized signatories of the Contractor and the State as required by law.

If the remainder of this Agreement is capable of performance, it shall not be affected by such declaration or finding and shall be fully performed.

28. Enforcement of Agreement/Waivers

- A. No covenant, condition, duty, obligation, or undertaking contained in or made a part of this Agreement shall be waived except by the written consent of the parties. Forbearance or indulgence in any form or manner by either party in any regard whatsoever shall not constitute a waiver of the covenant, condition, duty, obligation, or undertaking to be kept, performed, or discharged by the other party. Until complete performance or satisfaction of all such covenants, conditions, duties, obligations, and undertakings, the other party shall have the right to invoke any remedy available under law or equity, notwithstanding any such forbearance or indulgence.

33. Release

The Contractor, upon final payment of the amount due under this Agreement, releases the Lead State and Participating Entities, its officers and employees, from all contractual liabilities, claims and obligations whatsoever arising from or under this Agreement. Such consent shall not be unreasonably withheld. The Contractor shall give written notice to the State's authorized agent of such a possibility at least 30 days prior to the sale, transfer, assignment, or other disposition of this Agreement. Failure to do so may result in the Contractor being held in default. This consent requirement includes reassignment of this Agreement due to a change in ownership, merger, or acquisition of the Contractor or its subsidiary or affiliated corporations. This section shall not be construed as prohibiting the Contractor's right to assign this Agreement to corporations to provide some of the services hereunder. IBM warrants that the Program, when used in its specified operating environment, will conform to its specifications. The warranty applies only to the unmodified portion of the Program. IBM does not warrant uninterrupted or error-free operation of the Program, or that IBM will correct all Program defects. Licensee is responsible for the results obtained from the use of the Program.

During the Warranty Period (one year, starting on the date the original Licensee is granted the license), IBM provides Licensee with access to IBM databases containing information on known Program defects, defect corrections, restrictions, and bypasses at no additional charge.

Consult the IBM Software Support Handbook for further information at <http://www.ibm.com/software/support>.

If the Program does not function as warranted during the Warranty Period and the problem cannot be resolved with information available in the IBM databases, Licensee may return the Program and its PoE to the party (either IBM or its reseller) from whom Licensee obtained it and receive a refund of the amount Licensee paid. After returning the Program, Licensee's license terminates. If Licensee downloaded the Program, Licensee should contact the party from whom Licensee obtained it for instructions on how to obtain the refund.

EXHIBIT B – COMPLAINT RESOLUTION

IBM Service and/or Equipment

IBM is dedicated to maintaining a high degree of customer satisfaction. Key to this is a proactive approach to potential problems. However, when problems do occur we have well documented processes to assign the resource(s) necessary to quickly and accurately resolve customer problems.

Hardware and Software Support 1-800-IBM-SERV

The IBM support organization's goal is to ensure customer satisfaction by:

- Responding to your calls within targeted guidelines
- Providing ongoing communication regarding your problem status through problem resolution
- Taking ownership of your call for support
- Providing a defined escalation process when management assistance is needed
- Maintaining our commitment to continuous improvement of our service processes

IBM support gives you the ability to contact IBM and ask installation and usage related questions as well as make defect inquiries about eligible products. You have the option of voice (1-800-IBM-SERV) or electronic access (<http://www.ibm.com/support>) to a team of technical specialists. IBM support enables you to reduce your own research time, increase productivity, and concentrate more on your core business. Support is available 24 hours per day, 7 days per week, 365 days per year.

For all eligible products, IBM can help you with:

- General Support:
 - Usage and installation questions
 - Product compatibility and interoperability questions
 - Interpretation of product documentation
 - Diagnostic information reviews to help isolate the cause of a problem
 - Configuration samples
 - IBM and multivendor database searches
 - Planning information for software fixes
- Defect Support
- Electronic Support:
 - Submit problems and get answers electronically
 - View screens remotely
 - Submit documents electronically
 - View open problems that have been submitted
 - Search IBM's question and answer database

Before contacting support, you will need to gather information about the problem and have it on hand when discussing the situation with a specialist:

- Define the problem
- Gather background information
- Gather relevant diagnostic information

- Determine the business impact – assign a severity level
 - Severity 1
 - Critical business impact, this indicates you are unable to use the program resulting in a critical impact on operations. This condition requires an immediate solution
 - Severity 2
 - Significant business impact, this indicates the problem is usable but is severely limited
 - Severity 3
 - Some business impact, this indicates the program is usable with less significant features (not critical to operations) unavailable
 - Severity 4
 - Minimal business impact, this indicates the problem causes little impact on operations or that a reasonable circumvention to the problem has been implemented

When you call support to report an IBM software problem or update/gain status on a problem, your request will be routed to a technical specialist. For onsite support, IBM will attempt to diagnose and resolve the problem remotely before sending a technician onsite. Onsite response times vary dependent on purchased warranty and maintenance coverage options. IBM will use commercially reasonable efforts to respond by telephone to hardware and software service calls within two business hours during normal country business hours, and within two hours during off-shift hours for critical problems. Our initial response may result in resolution of your request, or it will form the basis for determining what additional actions may be required to achieve technical resolution of your request.

Whether you contact IBM by telephone or electronically, once logged, a unique problem management record (PMR) or Incident/Support case is created. Your PMR, Incident or Support Case is routed to a resolution team for handling. You may be transferred directly to the resolution team or your issue will be placed in a queue for call back. In either case, the next person you speak with will be a specialist in the appropriate resolution team.

At the resolution team level your call is researched, resolved, or escalated as appropriate. Due to the level of specialization required to maintain superior technical expertise at the team level, it is sometimes necessary to involve more than one support team in resolving a particular software problem. This is easily handled, as our support teams are all networked together and work as one to resolve whatever problems or issues arise.

If at any point in our service process, your expectations are not met by IBM, you may call our attention to this problem by asking to speak with a Duty Manager or by calling your local customer service executive. Escalations to an IBM manager will receive prompt attention and management focus. The Duty Manager or customer service executive will work with our technical staff to meet your expectations and appropriately handle your request. Further escalation procedures for complaint resolution are described in the following "IBM Complaint Management Process for Customer Complaints and Escalation Management" section of this RFP response.

IBM Billing and Ordering Support

IBM is committed to product order and invoice accuracy. Key to improving accuracy is IBM's electronic ordering and billing systems.

Electronic Billing:

IBM Invoices OnLine allows you to view your invoices using an Internet browser. Once you register with us providing an e-mail address and your IBM customer numbers, you'll receive a login ID and password. Whenever new invoices are issued, you will receive an e-mail notification alerting you to this fact. You can then login to Invoices OnLine and view them. You can also search the invoice database by customer number, date range, invoice type or payment status to view previously delivered invoices.

Electronic Data Interchange (EDI) will transmit invoices electronically to you and can feed right into your inventory management and / or accounts payable systems. IBM charges no fee for electronic invoicing. If you are interested in this method contact us by calling the toll free number on the top of your invoice or by sending a note to address in the upper left corner of your invoice and we will have someone contact you regarding this option.

eProcurement:

IBM can help leverage your investment by integrating your eProcurement system with an IBM electronic catalog. We provide the catalog with the products and prices you are entitled to through your current agreement/contract with IBM. Your end users can shop for the IBM products they need and place their order electronically.

In the event there is a problem with your order or invoice, IBM telephone support for ordering or billing inquiries is available from 8:00 am to 8:00 pm EST, Monday through Friday, by calling 1-877-426-6006, option 2.

IBM Customers with ordering inquiries also have the ability to submit an online request for order related inquiry.

Additionally, there are two different methods available within Invoices On-Line to electronically communicate with us if you have a question, comment, or problem with an invoice. The invoice inquiry function available from Invoices On-Line automatically creates a pre-populated inquiry form that includes the customer number, invoice number, your name, account name, e-mail address and telephone number is pre-populated on the form, all you need to do is select from a list the reason for your inquiry or invoice dispute and submit the form to us. We will review your request and respond to you as quickly as possible. You can also send an e-mail to us by clicking on the "Contact Us" button.

Once received by the IBM customer service team (telephone or electronic), our goal is to respond to your inquiry within one business day. Most inquiries are quickly resolved. If at any point in the inquiry process, your expectations are not met by IBM, you may call our attention to this problem by asking to speak with a CSO (customer service operations) Manager. CSO Managers are assigned geographically throughout the United States. Escalations to a CSO manager will receive prompt attention and management focus. They will work with our order and billing staff to meet your expectations and that appropriately handle your request.

Further escalation procedures for complaint resolution are described in the following section.

IBM Complaint Management Process for Customer Complaints and Escalation Management

The Complaint Management Process is the business process IBM uses to manage customer complaints and escalations when "business as usual" or advertised or entitled support processes have been exercised but have failed to resolve the customer's problem in a timely manner.

A customer complaint is defined as:

- A request from a customer or IBMer to correct an unfulfilled customer expectation or commitment/promise
- A failure from a previous customer-IBM interaction to deliver on a commitment/expectation

When the customer has attempted to exercise all or part of the advertised or entitled support structures to resolve a problem and is dissatisfied with its progress, customers may complain to an IBM executive. In these cases, these are referred to as executive complaints.

A critical situation is defined as:

- A customer complaint that is escalated within IBM to a status of Critical. Escalation to a Critical Situation is considered when
 - The problem is causing or is about to cause severe impact to the customer's business, or
 - Customer satisfaction has or is about to erode to the point that customer loyalty is in jeopardy, or
 - IBM determines that this problem is jeopardizing IBM's relationship with this customer and additional actions must be taken to save that relationship

An alert is defined as:

- A situation used primarily by the service/marketing offices to notify a pre-established list of people when a customer in that office/area has a critical product failure. This is often used for system down situations so that appropriate people are made aware of this situation and may act to resolve it.

A proactive situation is defined as:

- A situation created internally by IBM for the purpose of complaint avoidance. When an IBM employee becomes aware of a situation which may lead to customer dissatisfaction if not addressed, they may proactively engage additional resources to resolve the problem. The customer may or may not be aware that the situation has been opened.

The Complaint Management Tool is a consolidated, worldwide information system that supports management of customer and executive complaints, critical situations, proactive and alert situations. It links complaint management personnel in all geographies within IBM business units, product divisions, and headquarters for streamlined escalation management.

The key Roles and Responsibilities of the Complaint Management Tool are:

- Feedback Collector (FC), the person with initial contact with the customer
 - Captures key customer information, such as contact information and problem description
 - Categorizes the primary problem/issue so that the complaint can be routed to the most appropriate Resolution Owner
- Response Coordinator (RC), identifies the most appropriate RO or RTL or RA to engage in a situation when a request for assistance is made
 - Ensures right RO/RTL from their organization is assigned
 - Monitors progress against responsiveness indicators such as 7-day Close or Action plan, 48 hour RO acknowledgement, and 48 hour RTL assignment
 - Keeps functional management informed
- Resolution Owner (RO), acts as the customer advocate by serving as the primary IBM interface with the customer
 - Contacts the customer within 48 hours to acknowledge ownership of the situation and determine the customer's conditions of satisfaction
 - Develops and documents a customer-agreed to action plan within 7 working days of open
 - Qualifies situations for the escalation process
 - Engages a Resolution Team Leader and Resolution Assistants if assistance is needed to resolve the customer concerns
 - Confirms with customer that the issue is resolved to their satisfaction and that the customer agrees to closure
- Resolution Team Leader (RTL), teams with the Resolution Owner to resolve the customer's issue
 - Develops and manages the IBM internal resolution action plan

- Provides technical/organizational knowledge to help engage the right resources, including RAs
- Works in partnership with the Resolution Owner
- Resolution Assistant (RA), assists the RO or the RTL
 - Performs action plan tasks
 - Provides assistance in resolving the customer request or preventing recurrence
- Senior Executive Reviewer (SER) is the senior executive escalation process which provides
 - Issues already escalated through worldwide customer satisfaction project offices whose resolution was not acceptable to the General Manager of the Resolution Owner's (RO) organization
 - Situations affecting multiple customers which identify pervasive and complex issues involving multiple Divisions where the problems have not been resolved

How the CM tool works to resolve customer complaints:

- A customer complaint is received by any customer contact person (the Feedback Collector).
- The Feedback Collector records the customer's issue and contact information and categorizes the customer's primary problem. The FC requests assistance in assigning the appropriate Resolution Owner based upon the customer's issue.
- The RO contacts the customer within 48 hours to acknowledge ownership, explore the customer's conditions of satisfaction, develops an action plan which may involve escalation to various levels of management across divisions, and resolves the customer complaint. If resolution assistance is needed, the Resolution Owner requests assistance for a Resolution Team Leader to be assigned within 48 hours.
- The RO and the RTL document and execute the agreed-to action plan to resolve the situation.
- When the customer agrees the situation is resolved, the RO closes the situation.

Exhibit E – Website Product & Price Audit Requirements

Website Product and Price Audit

The IBM System x on-line WSCA/NASPO stores receive nightly, automated product updates which help ensure the accurate, contract-entitled products and prices are made available to WSCA/NASPO end users. In addition, the IBM web team will perform quarterly manual audits to validate product and pricing compliance. Specifically, IBM will randomly select several WSCA/NASPO stores to review products for appropriate discounts. We will rotate the part numbers reviewed quarterly in order to apply a broader sampling. This quarterly assessment will also be done for the other IBM brands to ensure the product and price files are accurately displaying information appropriate to the participating WSCA/NASPO entity. Upon request, IBM will provide a summary of the quarterly reviews.

Sales Audit Report Format:

- The IBM Contract Administrator for the WSCA/NASPO contract will perform quarterly audits to ensure the WSCA/NASPO end users paid the discounted or lower price. Specifically IBM will test one tenth of one percent (.001) of orders, at least one if any sales, no more than 100 orders per quarter. Orders will be randomly selected but will be reviewed to ensure different brands are covered. IBM will provide a summary of the quarterly reviews to the WSCA/NASPO Cooperative Development Team..
