

Oklahoma Workstation Standards

OMES Information Services has updated the state standards for workstations to meet the needs of the modern workforce and adjusted the acquisition process in order to comply with the requirements of the IT Consolidation and Coordination Act. All configurations and prices include licensing and services required to comply with [state IT Standards and the Oklahoma IT Security policy](#).

What's Included?

The state workstation standards include additional services and software to manage the entire workstation lifecycle, including but not limited to:

- **Pre-loaded state software image.** Workstation deployed with all standard software installed.
- **Enhanced hardware support.** Warranty includes 24/7 remote vendor support, and next day on-site vendor support.
- **Geo-tracking capabilities.** Ability to physically locate assets if connected to a network.
- **Streamlined installation and removal process.** Image, tag and deploy computers to your location. Remove and dispose of workstations according to EPA regulations. Provide an end-of-life certificate of destruction.

Why Lease?

OMES partnered with industry leaders to provide competitive leasing options for desktops, laptops and tablets. Leasing workstations provides the following benefits:

- **Budgeting is easier.** Consistent allocation of funds each year for technology refresh.
- **Current technology and warranty.** Leased systems refresh every three years, are under warranty and insured.
- **It is the state standard.** Purchasing workstations requires an exception.
- **Controls cost.** Old devices and those not under warranty are more expensive to maintain and drive up support costs for all agencies.
- **Better security.** Older hardware is not guaranteed to run modern security tools. Weak links increase the risk for all agencies.

Accessories

Accessories, such as monitors, keyboards, docking stations, etc., are not part of leasing. [Visit this page to purchase accessories separately.](#)

How it Works

1. Agency works with OMES IT Strategist and Account Executive to determine the type of computers the agency needs.
2. Agencies can order leased devices directly from their agency Dell Premier account on the dell website with their agency PO. (Contact AE for Access if you don't have it).
3. Devices will be received, imaged, tagged, and deployed to customers on site.
4. OMES will work with agencies to replace or remove workstations, recycle and provide an end-of-life certificate of destruction at the end of the three year lease.

How to Order

For more information, [contact the OMES Account Executive team](#) or refer to [the Partnering with OMES IS contact list](#) for your agency Account Executive's contact information.

OpenRange Service Catalog

View all OMES services available. For more information, visit [the OpenRange Service Catalog](#).

Cost

See workstation specification table for pricing information. Pricing is for hardware only and does not include the monthly tech essentials fee for desktop support. Agencies may purchase computers directly from apple via the SW1020A contract. Configuration and imaging of Apple computers requires additional tech services. Please contact your AE or IT Strategists for details

Desk-Centric

Works at their own desk most of the time during work hours.
