STATEMENT OF INTEREST

1. In 100 words or less, explain why you want to serve on the Residential Building Technical Committee:

As a Professor, research scientist and design engineer I believe in the use of the building code to protect human safety. The IRC as developed by the ICC is not as well structured as the IBC and does contain a number of issues that are not in the best interest of our state or citizens.

My area of expertise as a Professor, research scientist and design engineer is in the area of residential construction and is somewhat unique within Oklahoma. And I believe this training and knowledge is of value to the IRC adoption process.

2. List any other documentation or questions you have related to this Statement of Interest or any other information that may be pertinent to your selection to serve on this technical committee:

Applicant Signature: Chris Ramseyer Date: March 7, 2020
