

# Oklahoma Annualized Income Installment Method For Individuals

Tax Year 2002

FORM **OW-8-P-SUP-1**

(Enclose this form and Form OW-8-P with your return)

## General Information....

If you use this form for any payment due date, you must use it for all payment due dates. To figure the amount of each required installment the schedule automatically selects the smaller of the annualized income installment or the regular installment (increased by the amount saved by using the annualized income installment method in figuring any earlier installments). You must complete Section Two, Part One of Form OW-8-P before you can complete this form.

## Individuals....

The annualization method for Oklahoma estimated tax purposes is the same as that prescribed in the Internal Revenue Code. Therefore for additional information, use the Federal instructions for Form 2210 "Underpayment of Estimated Tax by Individuals, Estates, and Trusts" or Federal Publication 505 "Tax Withholding and Estimated Tax".

## Instructions

- Line 1** Enter your Oklahoma adjusted gross income for each period. This is your gross income, including your share of partnerships or S-corporation income or loss, for the period, minus your adjustments to income for that period.
- Line 6** Multiply line 4 by line 5 and enter the result on line 6. But if your itemized deductions would have been limited based on your annualized Federal adjusted gross income for the period, enter the reduced amount on line 6. To help you determine the reduced amount, you can use the instructions for the Federal Form 2210 or the Federal Publication 505.
- Line 8** Enter the larger of line 6 or line 7; unless, line 6 is less than the Federal standard deduction, then enter line 7. However, you do have the option to elect to itemize in each period. If you choose this option, enter "IE" next to the amount.
- Line 10** Add lines 8 and 9 and enter the result on line 10. But if you had out of state income during the period, you must first prorate your deductions and exemptions before entering the total on line 10. The method of proration will be the same as used on Form 511 and can be found in the instructions of the individual income tax packet. Enter the prorated amount on line 10.
- Line 11** Enter the full amount of the Adjustment to Oklahoma Adjusted Gross Income to which you would be entitled based on either your annualized income or expenses incurred during the period. These are the deductions and exclusions to which you are entitled to as adjustments from Oklahoma adjusted gross income to arrive at Oklahoma taxable income. These adjustments include, but are not limited to, partial military pay exclusion, qualifying disability deduction, political contribution, interest qualifying for exclusion and qualified adoption expense. For a complete list of these adjustments, see the instructions found in the individual income tax packet.
- Line 14** Compute what your Federal income tax deduction would be based on your annualized Federal adjusted gross income for each period. If your annualized Oklahoma adjusted gross income is less than your annualized Federal adjusted gross income, you must first prorate your Federal tax deduction before entering the total on line 14. To determine the proration, divide your annualized Oklahoma adjusted gross income by the annualized Federal adjusted gross income for the period. Multiply the resulting percentage by the Federal tax deduction computed for the period. Enter the result on line 14.
- Line 18** Include all the credits (other than withholding credits) you can claim because of events that occurred during that period. Do not annualize any credit. However, when figuring your credits, you must annualize any item of income or deduction used to figure the credit. Also, include any credit(s) you are carrying over from a previous year.
