

It should be noted that in numerous places on this map, it appears that the Annexation Ordinances were drawn in (referring to the CU GIS layer), but the locations and shapes do not appear to be accurate when compared with the OU Section Grid or with the Corporate Limits layer drawn in by INCOG staff. One example is where we have noted on the map Annexation Ordinance 703.

Ordinance 703

Similar in shape but incorrect location

This map was produced for the City of Sand Springs by INCOG's Mapping Department staff. Using ArcMap 9.3 the Corporate Limits boundaries were drawn based on Ordinances provided to INCOG by either the Tulsa County Clerk or the City of Sand Springs.
