

OKLAHOMA STATE TREASURER RANDY MCDANIEL

For Immediate Release: March 3, 2021

Total Receipts Down, Sales Tax Up

OKLAHOMA CITY – February Gross Receipts to the Treasury are down by less than one percent compared to collections from last year, but sales tax receipts are up by almost 8 percent, State Treasurer Randy McDaniel announced today.

Collections from all sources in February total \$950.8 million, down by \$6 million, or 0.6 percent, from February 2020. Since March of last year, monthly gross receipts have been below prior year collections every month except one, and that was due to the delayed income tax filings in July.

February sales tax collections exceed those of the prior February by \$28.2 million, or 7.9 percent. It marks only the second time in the past year that sales tax receipts have exceeded those of the same month of the prior year. Both instances are likely due to expenditure of the two rounds of federal stimulus payments.

“The Oklahoma economy is performing better than many other states,” Treasurer McDaniel said. “While gross receipts indicate the pandemic is constraining business and personal activity, the state is responding to the significant financial and social challenges relatively well.”

Combined income tax receipts for the month dropped slightly, with individual income tax collections up by 2.2 percent and corporate receipts down by 56.4 percent. Gross production collections are down by 45.9 percent and motor vehicle receipts are off by 9 percent.

The largest percentage of revenue growth for the month and past year is from medical marijuana tax collections. The marijuana tax produced \$5.5 million in February, a 64.7 percent increase over the year. For the past 12 months, the marijuana tax has produced \$60.3 million, a jump of more than 100 percent from the trailing period.

Combined gross receipts from the past 12 months of \$13.11 billion are below collections from the previous 12 months by \$601.6 million, or 4.4 percent. All major revenue sources show contraction during the period ranging from gross production taxes at 43.6 percent to combined income taxes at 0.8 percent.

Other economic indicators

The Oklahoma Business Conditions Index in February remained above growth neutral for a third month. The February index was set at 67.1, compared to 65.4 in January, 55.9 in December and 49.4 in November. Numbers above 50 indicate economic expansion is expected during the next three to six months.

The latest unemployment data available is from December, when the rate in Oklahoma was set at 5.3 percent, according to the U.S. Bureau of Labor Statistics. The state's jobless rate was down from 6.1 percent in November, but up from 3.4 percent in December 2019. The U.S. unemployment rate was set at 6.7 percent in December.

February collections

- Other sources generated \$1.54 billion, down by \$44 million, or 2.8 percent.
 - Medical marijuana taxes generated \$60.3 million, up by \$30.4 million, or 101.5 percent.

About Gross Receipts to the Treasury

The monthly Gross Receipts to the Treasury report, developed by the state treasurer's office, provides a timely and broad view of the state's economy.

It is released in conjunction with the General Revenue Fund report from the Office of Management and Enterprise Services, which provides information to state agencies for budgetary planning purposes.

The General Revenue Fund, the state's main operating account, receives less than half of the state's gross receipts with the remainder paid in rebates and refunds, remitted to cities and counties, and apportioned to other state funds.
