New Year Sees Gross Receipts Swell

Gross Receipts to the Treasury show Oklahoma's economy is doing very well at the start of the new year, State Treasurer Randy McDaniel announced today.

January gross receipts of $1.5 billion are up by more than 27 percent compared to the same month of last year. Twelve-month receipts of $15.5 billion measure growth of more than 18 percent compared to the prior period.

Treasurer McDaniel said analysis shows the reasons behind the numbers include more than organic state economic expansion.

“A growing economy is always central to record-breaking receipts, but federal funds and inflation are helping push the numbers higher,” McDaniel said. “All of these factors should be considered this session as proposals impacting future state revenue and spending are discussed.”

Federal direct payments to taxpayers, along with aid to businesses during the pandemic, significantly boosted economic activity in Oklahoma. Inflation during the past year pushed prices up an average of 7 percent – the highest rate since 1982.

The gross receipts report for January shows substantial growth in all major revenue streams. Gross production collections jumped by 149.5 percent, combined individual and corporate receipts rose by 28 percent, and sales taxes were up 18.8 percent. Motor vehicle collections increased by 6.7 percent.

Of note are use tax collections for the month. Paid on out-of-state purchases including internet sales, January use tax receipts topped $100 million for the first time in state history and jumped by 13.9 percent. Use tax collections have risen steadily since the U.S. Supreme Court’s Wayfair decision.

About Gross Receipts to the Treasury

The monthly Gross Receipts to the Treasury report, developed by the state treasurer’s office, provides a timely and broad view of the state’s economy.

It is released in conjunction with the General Revenue Fund report from the Office of Management and Enterprise Services, which provides information to state agencies for budgetary planning purposes.

The General Revenue Fund, the state’s main operating account, receives less than half of the state’s gross receipts with the remainder apportioned to other state funds, remitted to cities and counties, and paid in rebates and refunds.
