OKLAHOMA STATE TREASURER

MONTHLY INVESTMENT
PERFORMANCE REPORT

JUNE 2012

OKLAHOMA STATE TREASURER

July 31, 2012

To the People of Oklahoma:

I am pleased to issue the June monthly investment performance report for the Office of the State Treasurer. I trust you will find it thorough and in keeping with my commitment to provide full and complete disclosure of all activities within my office. As always, my staff and I are available to answer any questions you might have.

Market Conditions

Yields on U.S. Treasuries rose during June. Foreign investors were again the biggest buyers of Treasuries last quarter, absorbing 25% of net issuance. All purchases were by central banks or other official institutions. In June, the Dow Jones Industrial Average (DJIA) rose 3.9% to 12,880, the Standard and Poor's 500-stock index (S&P 500) jumped 4% to 1366 and the Nasdaq Composite rose 3% to 2935. For the quarter the DJIA fell 2.5%, while the S&P 500 retreated 3.3%. Federal Reserve Chairman Ben Bernanke appeared before the Joint Economic Committee of Congress in June. Mr. Bernanke noted the "significant" downside risks to growth posed by the looming fiscal challenges in both the U.S. and Europe. Mr. Bernanke emphasized that the Fed has tools available to support the recovery, but that it needed to look at costs and potential side effects of its various policy options. The Federal Reserve announced that it would extend Operation Twist through the end of the year, selling or rolling over \$267 billion of short-term holdings into longer-term Treasuries.

Economic Developments

Numerous reports were issued in June that affected performance of the markets during the month. The Institute for Supply Management reported that its index of manufacturing activity decreased to 53.5 in May from 54.8 in April. The unemployment rate rose from 8.1% to 8.2%, the first increase since last June, when it rose from 9.0% to 9.1%. The average workweek fell from 34.5 hours to 34.4 hours in May. It was 34.6 in February and has been unchanged at 34.5 since. U.S. average hourly earnings rose 0.1%, the same as in April. The producer price index fell on the back of falling energy prices. The consumer price index (CPI) declined 0.3%, the largest drop in prices since December 2008. The U.S. trade deficit narrowed in April to \$50.1 billion from a revised \$52.6 billion in March. The Conference Board's consumer confidence index slipped from 64.4 in May to 62.0 in June. This was the fourth consecutive drop in the index since it reached a 1-year high in February. Real gross domestic product (GDP) increased at a 1.9% annual rate during the first quarter of 2012. The Commerce Department reported a 4.8% decline in housing starts during the May period. There was a 1.5% decline in existing home sales in May. New home sales rose 7.6% in May, more than expected.

Portfolio Commentary: Performance, Diversification, and Strategy

Yield on the Treasurer's portfolio was 2.33% in June and the weighted average maturity was 989 days. Because of cash needs, securities totaling \$195 million were sold in June. This resulted in a rise in money market mutual fund balances. The year-to-date monthly average investable base increased to \$3.457 billion in June. Portfolio diversification continues to be sound. U.S. Treasury Inflation-Protected Securities represented 1% of holdings, and U.S. government sponsored enterprises accounted for approximately 34% of the portfolio. Mortgage-backed securities were 41%, municipal bonds were 2% and Certificates of Deposit represented 3% of assets. Money market mutual funds were 13% and the allocable portion of sales and use tax to General Revenue collected by the Oklahoma Tax Commission was 4% of assets. State Bond Issues (at 2%) and foreign bonds (at less than 1%) made up the balance of funds invested. In keeping with the State's statutory investment objectives, the portfolio strategy continues to seek safety, liquidity, and return on investment, in that order. Based on challenging and potentially volatile market conditions, portfolio strategy consists of a combination of laddered maturities and market observation for investment opportunities that will maximize income in a secure environment.

Collateralization

All funds under the control of this office requiring collateralization were secured at rates ranging from 102% to 110%, depending on the type of investment.

Payments, Fees, and Commissions

All securities were purchased or sold on a net basis utilizing competitive bidding where practicable, with no additional fees or commissions known to the State Treasurer. Bank fees and mutual fund operating expenses are detailed in the attached pages, as is the earnings split between the Treasurer and the master custodian bank on securities lending income.

Total Funds Invested

Funds available for investment, at cost basis, include the State Treasurer's investments at \$3,745,307,961 and State Agency balances in OK Invest at \$2,190,599,041 for a total of \$5,935,907,002.

Explanation of Performance Comparison

June 30, 2012

The following page presents market rates of return on the Securities portion of the General Account and of the State's aggregated State Agency Accounts. The figures, which are dollar- and time-weighted, where appropriate, are calculated using the percentage change in market value (inclusive of accrued income) from the end of the prior month to the end of the reporting month. To ensure the integrity of the data, this information is provided by the Treasurer's custodian bank acting in its capacity as an external third party. As such, performance measurement is presently confined to those investments which are custodied at J. P. Morgan Chase & Co.

The Treasurer's office is trying to develop a method to report rates of return on all investment instruments in the State's portfolio. This is in an effort to report return data in a manner recommended on September 15, 1994, by the Working Group of the Cash Management and Investment Oversight Commission. However, there are technical and conceptual challenges to expanding performance measurement to other portions of the portfolio. Attempting to apply market-base pricing calculations to instruments which do not trade, such as Certificates of Deposit, presents difficulty which is both conceptual and technical in nature.

Benchmark data is also provided on the following page.
