Economy Expands as Energy Prices Surge

Rapidly rising crude oil and natural gas prices helped push Oklahoma Gross Receipts to the Treasury into uncharted territory in October, State Treasurer Randy McDaniel announced today.

Gross receipts of \$1.27 billion for October and \$14.7 billion for the past 12 months set record highs yet again. Monthly receipts are up by 16 percent over the year and 12-month collections are 11.2 percent higher than during the prior period.

Treasurer McDaniel said the outlook for Oklahoma’s economy remains favorable.

“The growth we are seeing reflects true economic expansion even when inflationary factors are taken into consideration,” McDaniel said. “While the strong performance of the state economy – evidenced by record high collections and low unemployment – has become almost routine, it’s still impressive.”

Gross production collections topped \$100 million for a third consecutive month and grew by more than 100 percent compared to the same month of the prior year for the seventh month in a row.

October gross production receipts are from oil field activity in August, when West Texas Intermediate Crude Oil at Cushing averaged \$67.73 per barrel and Henry Hub natural gas averaged \$4.07 per million BTU. As an indicator of what’s to come, crude oil prices have risen 20

percent and natural gas by 35 percent in the past two months.

“The growth we are seeing reflects true economic expansion even when inflationary factors are taken into consideration.”

In October, every major revenue stream showed growth except for motor vehicle collections, which were down less than 2

percent. However, one line item – the

medical marijuana tax – fell below collections from October of last year by almost 5 percent. It marks the first year-over-year decline in that revenue source.

Collections from the past 12 months show growth in every major revenue stream.

Other indicators

The Oklahoma Business Conditions Index for October points to

anticipated economic growth in the coming months. The monthly index was set at 63.0, up from 58.6 in September. Numbers above 50 indicate expansion is expected during the next three to six months.

The September unemployment rate in Oklahoma was reported as 3.0 percent by the U.S. Bureau of Labor Statistics. The state's jobless rate was down from 3.3 percent in August and from 5.7 percent in September 2020.

The U.S. unemployment rate was set at 4.8 percent in August.

About Gross Receipts to the Treasury

The monthly Gross Receipts to the Treasury report, developed by the state treasurer’s office, provides a timely and broad view of the state’s economy.

It is released in conjunction with the General Revenue Fund report from the Office of Management and Enterprise Services, which provides information to state agencies for budgetary planning purposes.

The General Revenue Fund, the state’s main operating account, receives less than half of the state’s gross receipts with the remainder apportioned to other state funds, remitted to cities and counties, and paid in rebates and refunds.
