**Emulsified Asphalt Slurry Seal Surface and/or Polymer Modified Micro-Surfacing**  
Item: 36

**NOTICE:**

Work will consist of the application of micro-surfacing material to asphalt pavement surfaces & related surface preparation.

Cured micro-surfacing shall have a uniform and homogeneous appearance, substantially fill all cracks, and adhere firmly to existing surface.

Will be 1/2 inch thick. Micro-surfacing shall be placed without the occurrence of bleeding, raveling, separation or other distress.

Work will be performed in accordance with the current edition of "Recommended Performance Guidelines for Polymer-Modified Micro-Surfacing" A143 (revised) published by the International Slurry Surfacing Association (SSA) tests at one location.

Mix design shall be performed by a laboratory capable of performing all the current applicable International Slurry Surfacing Association (ISSA) tests at one location.

**Weather Limitations:**

Pavement temperature is 10°C (50°F) or below.

When the ambient air temperature is 10°C (50°) or below

When there is a forecast of temperatures (as per the National Weather Service) below 32°F within 24 hours after placement

When it is raining

As directed by the Engineer
