

2013-14 **FIRST LEGO League** Season for **Brickdraggins of NE OK**

Classical Conversations Homeschool Community of NE OK is in their 3rd exciting year of hosting the **Brickdraggins FLL TEAM!**

FIRST LEGO League helps our children learn science, technology, engineering and math (STEM) as they seek to find solutions to real world scientific challenges. Teams design their own solutions through a research project and build autonomous LEGO Mindstorms robots that perform a series of missions.

The 2013 challenge is “Nature's Fury” and FLL teams across the world will be exploring natural disasters to include storms, earthquakes, tsunamis, and more. Teams will look at what can be done when nature's fury impacts places where people live and play.

We could not do this without our generous sponsors, who believe in supporting children's involvement with STEM.
